PROFESSIONAL SUMMARY

Entry-level Full-Stack Developer skilled in building modern, responsive, and user-friendly web applications. Experienced in React, Next.js, Node.js, Express, and Prisma through community-driven projects and hands-on development. Passionate about writing clean, maintainable code and creating efficient, scalable systems. Strong collaborator with experience working in remote teams, documenting APIs, and solving real-world technical problems.

PROFESSIONAL EXPERIENCE

Backend Developer – Utility Management System | 2025 Oct – 2025 Nov

Community project (One Project One Month)

- Developed backend features using Express.js and Prisma, focusing on utility data management for apartments & condos.
- Implemented the authentication module, including secure flows and validations.
- Wrote complete Swagger API documentation for backend endpoints.
- Performed code reviews and collaborated with contributors to ensure clean architecture and maintainable code.

Frontend Developer – Team Collaboration Platform | 2025

Community project for university students

- Built a responsive web interface such as user portfolios, team creation, and project collaboration using React, Tailwind CSS, and shadcn/ui.
- Integrated Django REST API using React Query and custom hooks.
- Collaborated in a remote frontend team, maintaining clean code, reusable components, and Git workflow.

EDUCATION

Kasem Bundit University | 2024- Present

Bangkok, Thailand

Bachelor of Science in Digital Technology Innovation

PROJECTS

Project Management App | Solo Project

- A Trello-like full-stack application with workspaces, boards, task lists, and draggable tasks.
- In this project, I learned dnd-kit for drag-and-drop interactions and implemented role-based authorization using Better-Auth.
- Tech:** Next.js (Fullstack), Prisma, React Query, shadcn/ui, Zustand, dnd-kit, Better-Auth

Break Even Point (BEP) Calculator | Solo Project

- Created BEP formulas and automated calculations after learning the concept in university.
- Implemented unit tests and component tests using Jest and React Testing Library.
- In this project, I learned Jest and React Testing Library.

Utility Management System | Community Project (One Project One Month)

- A express.js backend system for managing utilities (water, electricity, rent) for apartments, condos, and residences.
- In this project, I learned Swagger documentation and collaborated effectively in a remote team using Git workflows.
